SUMMARY

Hi there! I'm a software developer with a passion for React, Ruby, Flutter, NodeJS, and Laravel. I'm also a mindful mentor, creative instructor, and cheerful team player. Let's build something awesome together!

SKILLS

Front-End: JavaScript, React, Redux, Flutter, Vuejs, Alpinejs, Quasar, Livewire, Tailwind CSS

Back-End: Ruby, Rails, PHP, Laravel, NodeJS, MySQL, PostgreSQL, MongoDB

Tools & Methods: Git, GitHub, Vercel, WSL2, Docker, Stripe, Cloudinary, Termius

Professional: Remote Pair-Programming, Teamwork, Mentoring, Meditation, Leadership

EXPERIENCE

[Bidsloth](#)

Remote

Founding Backend Engineer

Jun 2023 – Present

- Developed and implemented a secure backend infrastructure for the online auction platform using *Node.js* and *MongoDB*, resulting in an 80% improvement in system stability and scalability.
- Enhanced user experience by optimizing API response times via caching strategies, resulting in a 75% decrease in page load times.
- Implemented a payment gateway with *Stripe*, increasing sales by 30%.
- Enabled file upload capabilities with *Cloudinary* and *Socket.io* to support real-time interactions, achieving a 90% customer satisfaction score.
- Automated routine tasks such as data backups and maintenance activities with *node-schedule*, leading to an estimated 40% increase in operational efficiency.
- My contributions were crucial to the successful launch and scaling of [bidsloth.com](#), establishing it as a promising auction platform with a growing user base.

[ALPHA SIRIUS](#)

Remote

Full-Stack Developer

Feb 2023 – Present

- Develop the [customer ordering system](#) and the [merchant portal](#) of the Servdmm, a robust e-commerce platform, resulting in a 30% increase in online sales and a 20% decrease in cart abandonment rate.
- In charge of tech collaboration with 20+ famous companies like [Pizza Hut](#), to drive successful technological partnerships and achieve mutual business objectives.
- Prioritize the merchant's needs and provide high-quality service in a timely manner.
- Engineer the global version of the [Servd](#) platform while collaborating with talented colleagues to streamline operations and enhance platform performance.
- Develop and implement Laravel admin panels, including Orchid and Filament, to streamline and enhance the efficiency of administrative tasks.

- Utilized *React* and *Laravel* applications along with *RESTful APIs* and *SQL/NoSQL* databases to proficiently develop and maintain all Servd products, ensuring seamless functionality and user experience, leading to a 30% reduction in page load time and improved overall site performance.
- Conducted regular code reviews and implemented automated testing frameworks, reducing the number of bugs by 50% and ensuring the delivery of robust and error-free applications.

ROBUST AND BEST

Remote

Full-Stack Developer (Part-time)

August 2022 – Jan 2023

- Visualized, and developed the website, Earn To Learn from scratch using *React* + *Ruby on Rails* where users can earn points to exchange with their currency.
- Led and trained a team of 3 juniors during the project development phase.

AIDMA HOLDINGS

Remote

Full-Stack Developer (Freelance)

November 2022 – Jan 2023

- Restructured the massive code base of [the website](#) using *Vue* + *Quasar* as a frontend service and *Laravel* as a backend service. Both are run on *Docker*.
- Introduced new features to it while receiving strict code reviews.
- Architected a responsive website version by applying advanced CSS and in-depth debugging techniques.

EDUVALLEY

Yangon, Myanmar

Founder, CEO, Full-Stack developer

April 2019 – May 2022

- Conceptualized, developed, deployed, and published [the online learning platform](#) from scratch using *Flutter* and *Laravel*.
- Increased daily active users of the site by around 1k.
- Generated a profit of over \$3000 including sponsors even in the first month of launching.

EDUCATION

YANGON TECHNOLOGICAL UNIVERSITY

Yangon, Myanmar

Mechatronics Engineering

December 2016 – April 2020

- Learned Robotic Technologies and built multiple car bots.
- Achieved best performance award and best design award in STEM competitions.

MICROVERSE

May 2022 – Jan 2023

Remote Full-Stack Web Development Program, Full-Time

- Spent 1300+ hours mastering DSA, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Honed my remote pair programming skills by using GitHub, git-flow, and daily standups to communicate and collaborate with international developers.
- Achieved professional remote software development [certificates](#).

VOLUNTEER

MICROVERSE

Remote

Mentor

June 2022 – Jan 2023

- Mentored 3 junior web developers and provided support through code reviews.
- Proposed code quality improvements and overall performance results in outstanding projects recognized by the seniors in the global community.

THATEPANHUB

Remote

Backend Developer

Jan 2022 – June 2022

- Strengthened and debugged the backend structure of the complex relational database system.
- Successfully launched the new CMS for the organization using Laravel and Livewire.
